

# Leading the Charge to a Better Way to Drive

The world's largest and most open EV charging network.

## On your phone

Find an available charging station  
with our mobile app

## In your car

Go hands-free with our real-time  
charging data in your car's nav system

## Wherever you park

Charge your car at more than  
20,000 places

More and more people today are driving EVs, which is great for their wallets and for our planet. We like to think we've done a lot to make this happen with our intelligent network solutions for drivers, auto makers, and station owners.

## For Drivers

We're the biggest network, connecting EV drivers to more than 20,000 charging spots, and our network lets drivers see station availability in real time.

Here's why EV drivers choose us:

To plug in at one of our 20,000+ charging spots

To track fuel and greenhouse gas savings

To find charging spots and check station availability, all from our mobile app

To receive rock star treatment with EV tips, updates, and special offers

To get status notifications during charging sessions

To connect to the world's largest EV charging network with business operations in six countries and places to charge on four continents

## For Auto Makers

We're the most integrated, working closely with today's leading electric vehicle manufacturers as the preferred public charging partner connecting drivers with ChargePoint cards in their glove box, and integrating with in-dash navigation systems or auto maker mobile apps.

Using ChargePoint's API, the Fiat® Access mobile app keeps drivers connected to their Fiat 500e.

BMW i ConnectedDrive services for navigation are integrated with ChargePoint's real-time data.

Many EVs come ready with a ChargePoint card in the glovebox for convenient, easy access to any charging spot on the ChargePoint network.

# For Station Owners

We're the most open and technologically advanced smart network with custom charging solutions for any business.

We designed our network for the needs of station owners:

- + Provide visibility to station availability and charging status
- + Restrict station access to certain groups during certain hours
- + Flexibility to monetize your asset
- + Receive hassle-free 24/7 support for drivers from ChargePoint
- + Manage energy usage and costs
- + Scale your charging for future growth
- + Generate usage reports and analytics
- + Ability to network other EVSE hardware to our network

Whatever your business, EV charging is good for business.

## Workplace

- + Give your employees a raise of up to 5% by helping them save thousands of dollars on gas
- + Drive productivity by helping employees get out of traffic and into the HOV lane
- + Advance your sustainability goals and improve corporate image

## Retailers

- + Attract new customers who stay longer and spend more
- + Enhance your sustainability programs and improve your image with customers

## Municipalities

- + Attract residents and visitors to local retail
- + Drive revenue for your city and improve its image with residents and visitors alike

## Did you know?

With our new **Net+ Purchase Plan**, ChargePoint EV charging stations can be purchased with nothing down, and you can manage your charging operations to be net neutral or even cash flow positive.
